Lab Testing

- | | |
|--|--------------|
| Full Blood Lipid Panel/Glucose | \$49 |
| Measures: Total Cholesterol, HDL/TC Ratio, Triglyceride, HDL, LDL and Glucose. | |
| Chemistry Panel (\$270 value) | \$49 |
| Includes 14 essential tests typically requested by your doctor as part of a routine check-up. | |
| PSA (Prostate Specific Antigen) for Men (\$90 value) | \$49 |
| Detects prostate cancer. An annual PSA is recommended beginning at age 50 (40 for African American men). | |
| CA125 Blood Test for Women (\$100 value) | \$49 |
| Detects ovarian cancer. Hysterectomy doesn't preclude cancer. | |
| C-reactive Protein (\$100 value) | \$49 |
| Detects increased CRP, a substance produced by the liver when increased inflammation is present in the body that may I.D cardiovascular disease risk, heart attack or stroke. | |
| Urinalysis | \$49 |
| An ideal test used by physicians to locate the presence of substances that point to a wide variety of disorders. It is commonly used as a general indicator of overall health, during the early stages of pregnancy and prior to surgery. | |
| Testosterone | \$79 |
| Testosterone blood screening is integral in helping the physician diagnose the causes of sexual dysfunction. It is also used as a diagnostic tool for infertility and hormonally influenced diseases. | |
| Cholesterol Medication Maintenance Panel | \$79 |
| If you're on a cholesterol-lowering medication, this panel helps to ensure proper dosage and compliance prior to a prescription refill and also to see if there are any changes in liver function that may signal a problem. | |
| Diabetes Maintenance Panel | \$89 |
| Undetected diabetes affects millions of people by destroying vital organs, blood vessels and tissue without one's knowledge. Individuals with adult onset diabetes may already have cardiovascular disease. Heart disease, stroke, kidney failure and blindness are all risks that go up dramatically as a result of diabetes. | |
| Basic Blood Check-up (\$400 value) | \$129 |
| The perfect panel to gauge overall health. This is a good baseline blood chemistry. | |
| <ul style="list-style-type: none"> • CBC with Diff: tests for leukemia, anemia and blood clotting. • Chemistry Panel: tests for glucose, electrolytes, kidney, liver function. • TSH (Thyroid Stimulating Hormone)-Analyzes thyroid function. | |
| STD Blood and Urine Panel | \$249 |
| Unprotected sexual relations? If the answer is yes, then you could be infected with a sexually transmitted disease. Even if you have no symptoms, you could possibly spread it to your partner. Find out now. | |
| Fatigue Profile | \$379 |
| Can't seem to get enough rest? Managing life well, getting enough sleep but still feel tired? The fatigue panel may help identify reasons for a general lack of energy. | |
| Complete Male Panel | \$499 |
| Tells you how well your body is working. This overall basic check-up will assess your general adrenal and testosterone for fertility, libido and increased muscle mass. | |
| Complete Female Panel | \$499 |
| Gives you a complete picture of your general health, in addition to identifying proper hormone function so vital to the highly complex female body. | |
