For your appointment, call

800-541-8110

Screenings provided by Advanced Screening and Wellness, Michigan's Premier Screening Service
Serving Michiganders for over a Decade

Note: Health insurance generally does not cover the cost of these screenings

P.A.D. (Peripheral Artery Disease)

Utilizes Doppler ultrasound to determine possible blockages in the main arteries of the legs. An Ankle Brachial Index is obtained to screen for possible peripheral arterial disease. P.A.D. dramatically increases heart disease and stroke risk.

1

Stroke/Carotid Arteries

Utilizes ultrasound imaging to look into the artery for possible blockage. Each year 700,000 Americans have a stroke, the country's leading cause of disability and the third leading cause of death.

2

Stroke/Heart Disease/ Atrial Fibrillation

Atrial Fibrillation is an irregular rhythm of the heart which increases a person's risk for stroke and heart disease.

3

Abdominal Aortic Aneurysm

Utilizes ultrasound imaging to measure the aorta for a possible *aneurysm* - an abnormal enlargement of the main artery in the abdomen.

4

Heart/Echocardiogram (EXCLUSIVE)

Actually see your heart in motion. Utilizes ultrasound imaging (echocardiogram) to evaluate the heart muscle, size, chambers and valves. Screens for possible:

- Valvular disease
- Wall motion abnormality
- Enlargement
- Damage from high blood pressure
- Abnormal fluid
- Congenital defects

5

Full Blood Lipid Panel

- Total Cholesterol
- HDL/TC Ratio
- High Density Lipoproteins (HDL) - Good Cholesterol
- Low Density Lipoproteins (LDL) - Bad Cholesterol
- Triglyceride
- Glucose

12 HOUR FAST REQUIRED

6

Glucose

High levels of glucose most frequently indicate diabetes, but many other diseases and conditions can also cause elevated glucose. Guidelines based on recommendations of the ADA.

7

ALT/AST

Monitor liver enzymes to many prescription drugs such as Statins (lipid lowering), Antidiabetic, Antihypertensive as well as many others in a single blood test.

8

Screening Service

Oakwood®

P.A.D. | STROKE | HEART DISEASE

PREDICTABLE AND PREVENTABLE

OUR GOAL

Clinical Professionals at Oakwood Southshore Medical Center and Advanced Screening & Wellness are detecting possible disease earlier so that individuals can live their lives to the fullest.

THE PLAN OF ATTACK

We utilize state of the art medical technologies and clinical expertise to predict, diagnose and treat disease earlier, calling this model of care "EARLY HEALTH."

THE RESULT

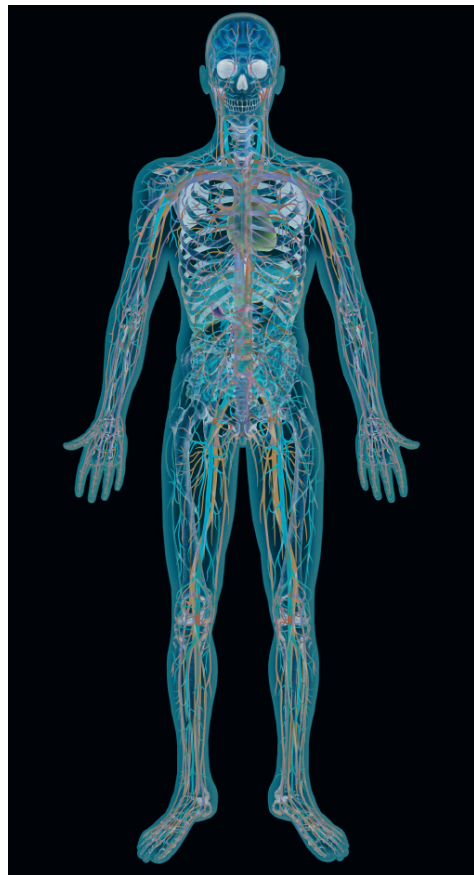

Early Health lowers the cost of healthcare to all individuals by focusing on disease in its early stages. When caught early, an individual has the very best opportunity to contain and sometimes eliminate the problem, before it becomes chronic, or worse, life threatening.

YOUR JOB

Take the next step. Read the information on the front of this letter and call the number today. Oakwood Southshore Medical Center, in collaboration with Advanced Screening & Wellness, are dedicated to preventing chronic and life threatening diseases such as P.A.D., stroke and heart disease. It's our new year's resolution to raise the bar to a new level of heart care.

The cost is small and the results can make a huge difference.

Healthy Regards,
The Staff at Oakwood Southshore Medical Center
